

BILAL AMIR

Full Stack Developer | React, Next.js, Node.js & TypeScript

Lahore, Pakistan • bilalamir610@gmail.com • +92 307 4418334

[Portfolio](#) • [LinkedIn](#) • Open to new opportunities

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable, high-performance web applications across the stack. Strong hands-on expertise in React, Next.js, and TypeScript on the frontend, paired with practical backend experience in Node.js, PHP, and Laravel, working with MySQL and SQL Server databases and REST/GraphQL APIs. Skilled at translating complex Figma designs into reusable, pixel-perfect UI components while also owning backend feature development, API integration, and database queries. Comfortable working across headless CMS architectures (Sitecore JSS, Strapi), with a track record of improving performance, accessibility, and Core Web Vitals in fast-paced Agile teams.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Node.js, PHP, Laravel (Blade), HTML5, CSS3
- Databases & APIs: MySQL, SQL Server, REST APIs, GraphQL, JSON
- Frontend & Styling: Tailwind CSS, Bootstrap, Responsive Web Design, Cross-browser Compatibility, Accessibility (WCAG)
- Architecture & CMS: Headless CMS Architecture, Strapi CMS, Sitecore JSS, WordPress
- Tools & Platforms: Git, GitHub, Bitbucket, VS Code, Cursor, Google Cloud Platform, Vercel, Figma-to-Code

PROFESSIONAL EXPERIENCE

Frontend Web Developer | **ApplyDreams**

Jul 2025 – Jul 2026

- Developed and maintained enterprise-grade web applications for international clients using Next.js, React, and TypeScript.
- Integrated Sitecore CMS with Next.js via Sitecore JSS and GraphQL, powering dynamic, content-driven experiences for enterprise platforms.
- Translated complex Figma design systems into reusable, scalable UI components, accelerating design-to-development handoff.
- Shipped multilingual English/Arabic experiences with full RTL and LTR layout support, extending platform reach to new markets.
- Improved frontend performance, accessibility, and Core Web Vitals scores through targeted optimization work.

Frontend Web Developer | **Hurak Technologies**

Feb 2025 – Jul 2025

- Worked across the stack to rebuild and maintain LMS and BMS platforms, pairing a Next.js frontend with a Laravel backend to modernize legacy interfaces.
- Connected frontend interfaces to backend APIs and contributed directly to Laravel feature development and database queries.
- Resolved UI defects and shipped new features that measurably improved usability against evolving business requirements.
- Built responsive, dynamic interfaces grounded in modern UI/UX principles.
- Strengthened system performance, stability, and cross-browser compatibility, reducing user-reported issues.

PHP Developer | **FoneRep**

Nov 2024 – Feb 2025

- Built custom Moodle themes and plugins in PHP, extending backend platform functionality for end users.
- Partnered with the product team to enhance platform features and overall usability.
- Enforced coding standards and performance best practices across all deliverables.

Frontend Developer | **XOSOFT Technologies**

2022 – 2023

- Engineered responsive React.js UI components that measurably improved page load performance across multiple products.
- Built a library of reusable design elements that eliminated duplicate code and sped up delivery across projects.
- Integrated frontend interfaces with backend APIs, ensuring reliable data rendering with minimal downtime.
- Refactored legacy code alongside senior developers into modular, maintainable components, improving long-term codebase stability.

SELECTED PROJECTS

ADQ Corporate Web Platform & Microsite

- Translated complex Figma design systems into highly reusable Next.js components for a large-scale corporate platform, mapping dynamic data via Sitecore Layout Service and GraphQL, and implementing full English/Arabic (LTR/RTL) localization.

Hurak Learning LMS Migration & BMS Platform

- Migrated the Hurak Learning LMS from a legacy Laravel monolith to a decoupled Next.js frontend, working with engineering leadership to adapt backend Laravel REST APIs for the new architecture.

IHPC Global Web Platform

- Built pixel-perfect, reusable React components within a decoupled headless architecture for the International Humanitarian and Philanthropic Council, mapping data from Sitecore via REST APIs and GraphQL while optimizing frontend performance.

Innovation Challenge Platform — Next.js, React, Strapi, GraphQL

- Built a headless CMS-driven full-stack platform on Strapi and Next.js, designing content structures in Strapi and consuming them through GraphQL to power dynamic content rendering, reusable components, and live voting functionality.

EDUCATION

Bachelor's in Computer Science — Superior University, Gold Campus, Lahore

CERTIFICATIONS

- React Basics — October 2023
- HTML, JavaScript & Bootstrap Certification Course — August 2023
- Introduction to Back-End Development — October 2023
- WordPress Express — October 2023
